

on the search for a joomla gallery

Searching for a gallery, we used a modified Joomla Smoothgallery Mambot. We are currently preparing the redesign of our new site at www.ninc.at. This Mambot for Joomla is released under GPL / GNU and it takes images from a directory, and displays them in form of a gallery. Our modifications include making the thumbnails visible all the time and changing the images by mouse overs. Here we go, go for galleries!

```
{smoothgallery folder=images/portfolio/hsa&width=950&height=534&embedLinks=false&lightbox=false}
```
